

Boukje Pilipili

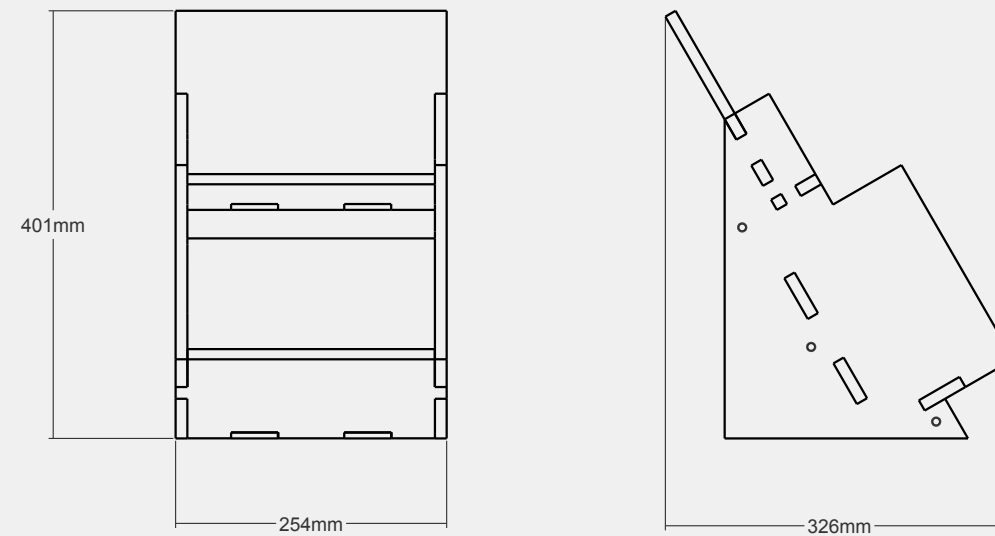

Materials

- OSB panel 11/12mm
- sandow 6mm

Tools

- clean cut : laser cutter or rough cut : jigsaw
- sander, paper sand...

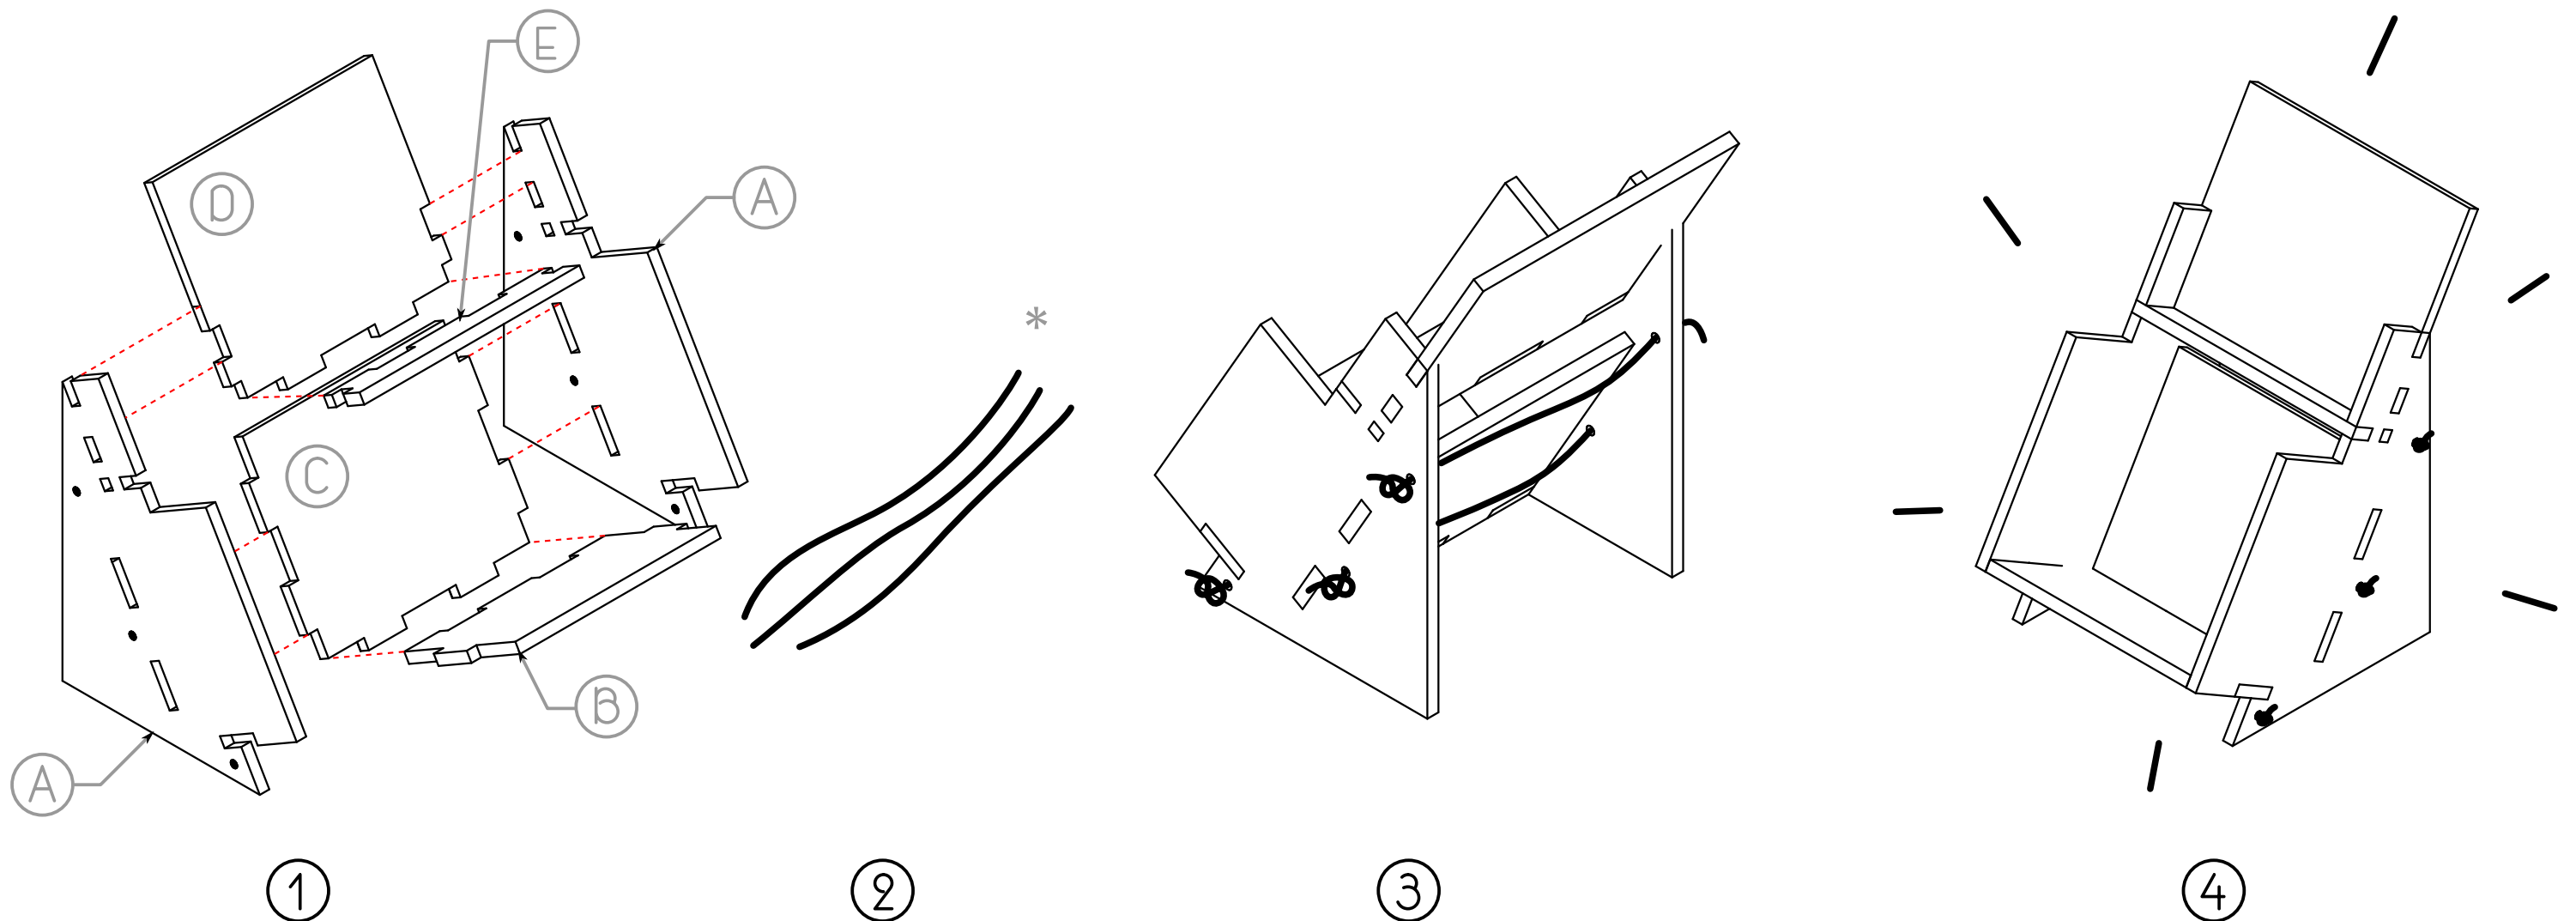

Boukje Pilipili

Building steps

- first you will find in the package a dxf file ready to use for laser cutting. A 60x60cm panel is the minimum size to extract all pieces of the Boukje Pili
- After cut, you should need to sand down the edges. Then you'll be able to mount your Boukje by following visuals steps below.
